

Introducing an alternative to both deep waste containers and traditional garbage bins.

The 4.5-yard EnviroWirx waste container provides all of the advantages of the larger 7-yard container, without the extra costs!

SAVE SPACE

- Does not require fenced enclosure or roof
- Can be installed in visible areas designated as undesirable for steel bins

SAVE MONEY

- Can be picked up by any hauler with front forks
- Does not require replacement bags/liners

IMPROVE APPEARANCE

- Unique concave ridge surface a deterrent for graffiti
- Secure lid design keeps wildlife out

The BIGGEST advantage of a 4.5-yard EnviroWirx container is you get all of those listed and...

NO EXCAVATION REQUIRED!

The unit rests on a concrete ring (included) meaning you don't have to worry about digging down like with other deep waste containers. Also, this provides you the option of changing the location of your container if you ever desire!
